

# DHL TRADE AUTOMATION SERVICE

DHL Trade Automation Service is a free online tool providing the essential Customs information you need to plan, budget, and understand international shipping requirements.

## MAKE INTERNATIONAL TRADE LESS TAXING.

DHL Trade Automation Service (TAS) provides you the most easy-to-use, comprehensive international trade resources. TAS is designed to help you search and compile all your vital information quickly and easily. Receive information alerts to ensure your restricted party, landed cost estimate, compliance and document report results are accurate and complete. Receive end-to-end Customs compliance criteria and unlimited access to millions of international trade regulations. Databases are updated daily to keep you informed of changing shipping protocols and enabling you to make sound import and export business decisions.

### Benefits

- Access Customs information from a single source
- Eliminate time consuming administration
- Make knowledgeable sourcing and distribution decisions
- Optimize your supply chain

# DHL TRADE AUTOMATION SERVICE

## Simplify the complexities of global trade with DHL Trade Automation Service.

One solution gives your business the advantage of up-front cost estimates from multiple countries to better manage sourcing and distribution decisions. Know exactly how your costs are being allocated with our straightforward calculations that provide a complete breakdown of your landed cost estimate. Obtain relevant shipment documentation, related trade regulation information and applicable licensing requirements – with our search-friendly product classification code tool and reporting capabilities.

### FEATURES

- **Landed Cost Estimator** – know the cost to ship between countries by receiving an estimate of duties, taxes and other import fees
- **Comparative Services** – assess sourcing options between countries in one simple report providing landed cost estimates, shipping guidelines and commodity regulations
- **Restricted Party Screening** – check for shipping restrictions from government and international authority maintained databases of denied party lists
- **Product Compliance Check** – ensure your commodities comply with each country's import and export regulations
- **Interactive Classifier** – obtain Export Control Classification Numbers (ECCN), Harmonized System, Schedule B, ASEAN Harmonized Tariff Nomenclature (AHTN) codes for any commodity
- **Trade Document Library** – access a comprehensive collection of import and export documents organized by country
- **Service Reports** – store up to 100 shipment profiles for 90 days, with the ability to update saved reports, for the most current information
- **Product Catalog** – store commodities in TAS for the quickest access to current information
- **Address Book** – save your contacts to expedite form completion
